Grade: 6 Teacher: Serrano

Portfolio Student Reflection Form

Type of Work Selected: Roller Coaster project Topic: Kinetic & Potential Energy

Identify the GLOBAL CONTEXT that this work connects most closely to: Globalization & Sustainability

1. How does this work relate to this Global Context? This relates to the global context because it is a human made system.
2. What Key Concept(s) were you working on? Creativity, Global Interactions
3. Why did you choose this sample of your work? I chose this sample of my work because it was very fun to build and design, and it helped me better understand the topic.
4. What do you like about this selection? Why? What I like most is the design I created, because it is very creative and fun.
5. If you were to do this work again, what would you change? Why? If I were to do this again, I would change the track shape, to make it more interesting, and longer.
6. Write a short 4-5 sentence paragraph explaining how this assignment advanced your understanding of the topic and what the IB Learner Profile attribute you exhibited in completing this assignment. (Inquirer, Knowledgeable, Thinker, Communicator, Principled, Open-Minded, Reflective, Balanced, Risk-Taker, Caring).
This assignment advanced my understanding of the topic is allowing me to apply it to real life. It also did this by helping me visualize the connection. The attribute I displayed in completing this assignment is Knowledgeable. This is because I had to apply my knowledge of the topic to make the project.
